To Whom It May Concern

Dear Sirs

ASME, WELDING SERVICES

Asme Welding Services have been employed by main contractor J N Bentley Ltd on the installation of welded steel and flanged pipe work up to 914mm OD on the Northumbrian Water Cow Green Reservoir Emergency Drawdown contract.

The work took place within the confines of the existing concrete dam structure and require considerable degree of initiative, cooperation, thoughtful planning and accurate working by Neville Keeling and his team to overcome the many difficulties of limited spaced and restricted access and still complete within programme.

Asme were also responsible for arranging the testing of the welds and for applying the final protective paint coating to the completed joints. The quality of workmanship was excellent.

Yours faithfully

Richard.Skinner
ECC Project manager
